

Alpha words
cross narrow
lines and each
return must
preserve a
separating space
before the next
ordinary word begins
in compact
English prose.

Bravo words
wrap through
the same narrow
measure so every
visual line
boundary remains
an ordinary
word boundary
in compact
English prose.

Charlie words
finish the
three column
control and every
wrapped return
keeps the request
readable without
joining nearby
words in the
third column.
